

The New SF-6Dv2™ Health Utility Survey & Index:

A Better Way to Measure Health Utility & Prove Value

WHAT'S THE SCORE?

A health utility score provides a summary index of health-related quality of life (HRQoL). This score can be an invaluable tool for life sciences, pharma and biotech companies in:

- **Cost-utility analyses** to calculate quality-adjusted life years
- **Population studies** as quality weights for calculating quality-adjusted life expectancy

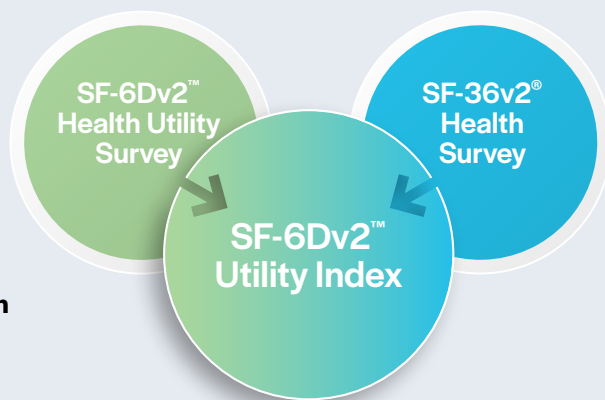

By generating meaningful data on functional health and well-being with increased convenience and accuracy, our **stand-alone, short-form** SF-6Dv2™ Health Utility Survey and SF-6Dv2™ scoring capability can help you **demonstrate the value of your products** to key stakeholders throughout the healthcare continuum.

SCIENTIFICALLY PROVEN

The SF-6Dv2™ survey was developed using content from one of the most widely used measures of health for quality-adjusted life year (QALY) calculations, the SF-36v2® Health Survey.

The SF-6Dv2™ provides keen insights into patient health and product performance by measuring 6 health domains:

- **Physical Functioning**
- **Social Functioning**
- **Mental Health**
- **Role Limitations**
- **Pain**
- **Vitality**

1 HEALTH UTILITY INDEX, 2 PATHS

In pharmacoeconomics, health utility scores are often used to compare the overall benefit of one pharmaceutical drug or therapy to another (or the status quo). Depending on your needs and goals, the SF-6Dv2™ score can be derived from responses to either the SF-6Dv2™ survey or the SF-36v2® survey. You can even get the new SF-6Dv2™ score from past datasets of studies that used the SF-36v2®.

THERE'S STRENGTH IN QUALITYMETRIC'S NUMBERS

We are recognized leaders in Patient Reported Outcome (PRO) and Clinical Outcomes Assessment (COA) measurement solutions, working with the top healthcare and life science companies to better understand functional health and well-being.

41,000,000 Survey Administrations

92,290 License Requests

41,000 Peer-reviewed Publications

5,500 Published RCTs Have Used Our Instruments

100+ Benchmarks

190 Language Translations of the SF-36v2®

50+ Label Claims

25 Years in Business

KEY ENHANCEMENTS IN SF-6DV2™ UTILITY INDEX

Based on the **most widely used measure of health** for quality-adjusted life year calculations, the SF-36v2® Health Survey

Clear and consistent wording to improve the measurement and understand overall health

Increased flexibility for users deriving the health utility score from either the SF-6Dv2™ or SF-36v2® Health Survey

Stand-alone survey with six questions to produce a single SF-6Dv2™ health utility score

Takes only 1-2 minutes to complete, **easing the burden on patients** who are taking the survey

THE BENEFITS ARE CLEAR & SIMPLE

Gain a *clear* picture of health to:

- Prove product efficacy and economic value to payers, providers and regulators
- Compare the overall benefit of one drug or therapy to another (or the status quo)
- Support evidence generation to substantiate label claims for approval
- Make the case for the inclusion of a drug in formulary decision-making
- Promote a product or therapy in marketing and awareness campaigns
- Engage physicians and educate them on the value of a product or treatment

Simplify the survey-taking process for patients

SaaS

QualityMetric's surveys and scoring capabilities can be accessed via **our secure Software as a Service (SaaS) platform**. With SaaS, you and your team can take advantage of our powerful, cloud-based PRO data collection, scoring and reporting tools without having to download and install the software.

A WORLD OF ANSWERS

SF-6Dv2™ is scored using country-specific weights that are available from the United Kingdom, China, and Australia, with weights currently being developed for the United States.

OUR TEAM IS HERE TO BACK YOU UP

When you work with QualityMetric, you gain access to **scientists, researchers and health experts** knowledgeable in developing, processing and scoring assessments for a range of health-related outcomes.

- Our multidisciplinary team leverages **decades of experience in more than sixty diverse therapeutic areas** to power the implementation and interpretation of comprehensive COA solutions.
- In addition, our scoring solutions provide easy-to-use certified scoring with data quality checks and protection against common coding problems.

REACH OUT TODAY TO LEARN MORE.

Whether you've used PRO health surveys before to measure functional health and well-being, or you're just starting out, our SF-6Dv2™ survey and scoring can help your team **make informed decisions at every point in your product's life cycle**. Contact us today.
